

### Training Calendar for the year 2026

| <b>Name of KVK: Krishi Vigyan Kendra, Rayagada (Odisha)</b> |                                                                                |                                  |                                       |                        |                            |
|-------------------------------------------------------------|--------------------------------------------------------------------------------|----------------------------------|---------------------------------------|------------------------|----------------------------|
| <b>Sl. No.</b>                                              | <b>Title of the training</b>                                                   | <b>Date</b>                      | <b>Venue :<br/>(On - campus/ Off-</b> | <b>Target groups</b>   | <b>No. of participants</b> |
| 1                                                           | Green manuring of rice with dhaincha/ sunhemp                                  | 25.05.26<br>01.06.26             | Off- campus                           | Farmers and farm women | 60                         |
| 2                                                           | Seed production of green manure crops                                          | 15.06.26                         | Off- campus                           | Farmers and farm women | 30                         |
| 3                                                           | Integrated crop management in cotton                                           | 20.06.26                         | Off- campus                           | Farmers and farm women | 30                         |
| 4                                                           | Cost minimization with efficient weed and nutrient                             | 25.06.26                         | Off- campus                           | Farmers and farm women | 30                         |
| 5                                                           | Crop management of climate resilient direct seeded rice                        | 29.06.26                         | Off- campus                           | Farmers and farm women | 30                         |
| 6                                                           | Integrated crop management in Pigeon pea                                       | 01.07.26                         | Off- campus                           | Farmers and farm women | 30                         |
| 7                                                           | Balanced fertilizer use and INM in rice                                        | 25.07.26                         | Off- campus                           | Farmers and farm women | 30                         |
| 8                                                           | Crop management practices for high yielding finger millet                      | 14.08.26                         | Off- campus                           | Farmers and farm women | 30                         |
| 9                                                           | Integrated crop management in Sunflower                                        | 02.11.26                         | Off- campus                           | Farmers and farm women | 30                         |
| 10                                                          | Organic nutrient management in field/horticultural crops                       | 04.12.26                         | On -campus                            | Farmers and farm women | 30                         |
| 11                                                          | Pond based integrated farming system for small ponds                           | 02.1.27                          | Off- campus                           | Farmers and farm women | 30                         |
| 12                                                          | Enhancing production and quality through efficient crop management in marigold | 06.06.26<br>14.07.26<br>15.10.26 | Off- campus                           | Farmers and farm women | 90                         |
| 13                                                          | Processing and value addition of tamarind for empowering WSHGs                 | 11.03.27<br>19.03.27             | On -campus                            | Farmers and farm women | 60                         |
| 14                                                          | Canopy management in guava for enhancing fruit yield                           | 23.06.26                         | Off- campus                           | Farmers and farm women | 30                         |
| 15                                                          | Integrated crop management in onion                                            | 10.11.26                         | Off- campus                           | Farmers and farm women | 30                         |
| 16                                                          | Post harvest management of pineapple to avoid distress sale                    | 08.09.26<br>25.09.26             | On -campus                            | Farmers and farm women | 60                         |
| 17                                                          | Utilization of inter space in cashew orchard for                               | 30.07.26                         | Off- campus                           | Farmers and farm women | 30                         |
| 18                                                          | Crop establishment method and rationalization of planting                      | 17.11.26                         | Off- campus                           | Farmers and farm women | 30                         |
| 19                                                          | Natural farming in high valued vegetable crops                                 | 09.12.26                         | Off- campus                           | Farmers and farm women | 30                         |

|    |                                                                          |                                  |             |                        |    |
|----|--------------------------------------------------------------------------|----------------------------------|-------------|------------------------|----|
| 20 | Integrated management of major pests and diseases of chilli              | 23.06.26                         | Off- campus | Farmers and farm women | 30 |
| 21 | Managing major pests of kharif rice with adoption of IPDM                | 30.06.26                         | Off- campus | Farmers and farm women | 30 |
| 22 | Ecological pest management strategy for managing sucking pests of cotton | 08.07.26                         | On -campus  | Farmers and farm women | 30 |
| 23 | Management of fall army worm and other pests of maize                    | 15.07.26                         | Off- campus | Farmers and farm women | 30 |
| 24 | Major pests of pigeon pea and their integrated management                | 05.08.26                         | Off- campus | Farmers and farm women | 30 |
| 25 | Management of insect and disease pests of banana                         | 02.09.26                         | On -campus  | Farmers and farm women | 30 |
| 26 | Artificial brooding techniques of chicks for backyard poultry            | 23.09.26                         | On -campus  | Farmers and farm women | 30 |
| 27 | Organic pest management in chilli                                        | 06.10.26                         | On -campus  | Farmers and farm women | 30 |
| 28 | Feed and disease management in dairy milch cows                          | 16.12.26                         | On -campus  | Farmers and farm women | 30 |
| 29 | Integrated pest management of pests of blackgram and                     | 23.12.26                         | On -campus  | Farmers and farm women | 30 |
| 30 | Minimization of crop losses due to pests through IPDM in                 | 06.01.27                         | Off- campus | Farmers and farm women | 30 |
| 31 | Integrated pest and disease management in mango                          | 03.03.27                         | On -campus  | Farmers and farm women | 30 |
| 32 | Paddy straw mushroom production                                          | 21.07.26<br>31.07.26<br>12.08.26 | On -campus  | Farmers and farm women | 90 |
| 33 | Oyster mushroom production for SHGs                                      | 08.12.26                         | On -campus  | Farmers and farm women | 30 |
| 34 | Natural farming practices for field and horticultural crops              | 07.09.26<br>-<br>11.09.26        | On -campus  | Rural youths           | 20 |
| 35 | Entrepreneurship on Vermicompost production                              | 02.02.27<br>-                    | On -campus  | Rural youths           | 20 |
| 36 | Processing and value addition in cashew and pineapple                    | 15.03.27-<br>19.03.27            | On -campus  | Rural youths           | 20 |
| 37 | Propagation techniques in horticulture crops                             | 10.08.26-<br>14.08.26            | On -campus  | Rural youths           | 20 |
| 38 | Production of bio-inputs for pest management                             | 05.10.26-<br>09.10.26            | On -campus  | Rural youths           | 20 |

|    |                                                                                           |                   |            |                         |    |
|----|-------------------------------------------------------------------------------------------|-------------------|------------|-------------------------|----|
| 39 | Bee keeping for income generation of SHG                                                  | 15.02.27-19.02.27 | On -campus | Rural youths            | 20 |
| 40 | Training on Mushroom spawn production                                                     | 17.08.26-21.08.26 | On -campus | Rural youths            | 20 |
| 41 | Climate resilient agriculture practices                                                   | 09.09.26          | On -campus | Extension functionaries | 20 |
| 42 | Recent advances in weed and nutrient management in field crops                            | 09.01.27          | On -campus | Extension functionaries | 20 |
| 43 | Hydroponic farming in horticulture crops                                                  | 06.01.27          | On -campus | Extension functionaries | 20 |
| 44 | Updating IS personnel knowledge on application of precision farming in cashew cultivation | 16.02.27          | On -campus | Extension functionaries | 20 |
| 45 | Pest and disease management using biological method                                       | 12.08.26          | On -campus | Extension functionaries | 20 |
| 46 | Integrated pest and disease management in horticultural                                   | 10.01.27          | On -campus | Extension functionaries | 20 |
